

FEEL THE TEXTURES OF SHELLS

- *Pick up a shell and rub your fingers over it. Is it bumpy or smooth?*
- *Notice the colors and patterns.*
- *Game: Group similar shells together by color, size, ascending size, etc.*
- *If you live by the sea, watch and listen to the waves!*

- Shells are the hard outer covering of some mollusks, such as snails, clams, and oysters.
- The shape, size, and color of shells can vary greatly depending on the species.
- Some shells are used as homes, while others are used for protection.
- Shells can be found in a variety of habitats, including the ocean, rivers, lakes, and even deserts.

ENJOY A WINDY DAY

- *Hang wind chimes up and listen to their beautiful music.*
- *Look up in the sky and watch the clouds drift by.*
- *Watch the trees sway in the wind.*
- *Feel the breeze on your skin.*

- Wind is the movement of air from areas of high pressure to areas of low pressure.
- Wind can be caused by differences in temperature, the rotation of the Earth, and the uneven heating of the Earth's surface by the sun.
- Wind can be used to generate electricity, power boats, and sail ships.
- Wind can also be used for recreation, such as flying a kite and windsurfing.

LISTEN TO THE BEAUTIFUL MUSIC OF BIRDS

- *Open up the window and listen to the birds.*
- *Watch them fly in the sky and between tree to tree.*
- *Cue up different bird videos and songs on Youtube.*

- Birds play an important role in the ecosystem by eating insects, pollinating plants, and dispersing seeds.
- Birds are also a source of food and recreation for humans.
- Birds use their songs to communicate with each other.
- Songs can be used to attract mates, defend territory, or warn of danger.
